

EXECUTIVE SUMMARY

Eradicator Plus™, Gorman-Rupp's most aggressive solids handling pump to date, is specifically designed for installations where nuisance clogging is affecting uptime and costly maintenance. Eradicator Plus' innovative design is currently available for 3", 4" and 6" Super T Series® pumps. For those extreme-duty applications where municipal waste, wipes, industrial by-products, agricultural wastes, and other organic solids are present, Eradicator Plus cuts and tears the solids – allowing them to pass through the pump.

SUPER T SERIES® – ERADICATOR PLUS™

Each Eradicator Plus™ pump includes:

1. Patented, lightweight inspection cover for faster access to the impeller without affecting impeller to wear plate clearances
2. Improved back cover plate incorporating an obstruction free flow path
3. Extra thick, G-R Hard Iron, Eradicator® style wear plate with water jet cut notches, grooves and an oversized, lacerating "tooth"
4. Rugged, heavy-duty continuous vane impeller constructed of G-R Hard Iron with thick back shroud incorporating pump out vanes
5. High strength, 17-4 PH stainless steel impeller shaft

RETROFIT KITS FOR SUPER T SERIES

(Issue 1 – "Old" Style, One Piece Back Cover Assembly)

	Eradicator Plus™ Back Cover Kit	Rotating Assembly
T3	48275-839	44163-827
T4	48275-815	44163-764
T6	48275-836	44163-824

(Issue 2 – "New" Style with Inspection Cover)

	Eradicator Plus™ Wearplate	Rotating Assembly
T3	46451-399 24160	44163-827
T4	46451-384 24160	44163-764
T6	46451-797 24160	44163-824

FEATURES & BENEFITS

- **Reduction in Nuisance Plugging**
 - Super T Series Eradicator Plus models greatly reduce the clogging of debris
 - Effectively breaks-up larger solids
- **Greater Efficiency**
 - New back cover design allows for a more efficient flow path
 - Clogging of any degree severely impacts pump efficiency
- **Overall Life-Cycle Cost Savings**
 - Reduced maintenance periods
 - Lower energy costs
